Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt of the amendments and remarks submitted April 2, 2001 is acknowledged.

Double Patenting Rejections

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,015,833. For reason stated in the prior office action.

Claim Rejections 35 U.S.C. § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Cook et al. (US 5,554,646 of record) and Cook et al. (US 5,428,072 of record) in view of Chin et al. (IDS, November 23, 1999) for reasons set forth in the prior office action.

Response to the Arguments

4. The amendment and remarks submitted April 2, 2001 have been fully considered. They are persuasive to overcome the rejection under 35 U.S.C. 112, but are not persuasive to overcome the rejection under 35 U.S.C. 103 for reasons discussed below.

5. Regarding the remarks that Chin's statement "c-9, t-11 CLA isomer is believed to be the biologically active form;" is a simply a hypothesis. Note such 'hypothesis' have provided reasonable suggestion and motivation to make the instant composition.

Regarding the remarks that the method of making CLA in Cook may produce a CLA composition contains large amounts unwanted isomers. Note, question under 35 U.S.C. 103 is not merely what reference expressly teach, but what they would have suggested to one of ordinary skill in the art at the time the invention was made; all disclosures of prior art, including unpreferred embodiments, must considered. In re Lamberti and Konort (CCPA), 192 USPQ 278. Cook teach the concept of feeding animal with CLA composition wherein the CLA are 9, 11 and 10-12 regio-isomers. Chin further teaches the particular isomer is believed to be the active isomer. The person with ordinary skill in the art would be motivated to making the composition. Further, applicants conclusion that Cook would produce large amount of unwanted isomers is not convincing because the conclusion is based on result from a similar method, not from the method of Cook.

Regarding the remarks about reasonable expectation of success, note the claims are directed to a composition. The issue is: will a person with ordinary skill in the art be able the make such composition, the issue is not whether Cook's disclosed method therein can make the claimed composition (in large scale). As stated in the prior office action, making such

composition is considered within the skill of artisan. Regarding the remarks about the unexpected results, note the unexpected results means the claimed composition has unexpected result in respect to their application, i.e., animal feeding. The criticality of the particular defined percentage of each ingredient is not seen in the specification.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
